Saviour Dagadu

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs | Remote / Los Angeles, CA

January 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full-stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Open Grill Dallas & BiteHub (Full stack Web App) – Baristas can take food orders from customers with their names and address. Baristas can log in to the app, see orders made, and mark as complete. Orders that have been completed will add up to the total revenue generated.

Cravy Social (Full stack Web App) – Platform to help interact with friends and family! Savvy Social brings family and friends together online no matter the location once there is network access. They can post, like, delete, and update articles, photos, and more

Other Projects: Ridley 2: "Flappy Bug" Game, Matching Cards Game, Anime List, and many more

Full Stack Web Developer at Savvy Tech Devs | Dansoman, Accra

January 2020 — Present

Created full-stack web applications and static websites for different clients across small and medium-sized businesses. Also, consulted on SEO and social media strategy. Some clients included: Devaco Collections, Sea Technology, the Open Grill Dallas website, and more.

Freelance: Research Assistant at Local and International Research Org. in Ghana includes: IPA, USAID, ICI, ISSER, GSS, Word Bank GROUP

August 2013 — Present

Established a strategy and data collection methods that gain a 98% coverage rate for the preschool research project and won the best team leader on the project.

VOLUNTEERING

Application Support Engineer at 233 Apps | Mataheko, Accra

March 2015 — April 2020

Resolved product design, acquisition, and launch concerns to achieve the customer's targeted business goal.
